Hotek 2900 MINI

An innovation by the Hotek Hospitality Group

It is with pride that we present the smallest key card system in the world. The Hotek 2900 MINI is an exclusive design by Hotek and 100% made in Holland. This unique design is based on the appearance of the well-known iPhone: small, stylish and ingenious.

What is unique about the Hotek 2900 MINI is that it is compatible to every type of door handle and applicable in all environments. You actually have the your choice of the door handle model on your hotel room doors. The appearance and architecture of your hotel are no longer determined by door handles with associated locks.

The ease of use of the Hotek 2900 MINI is huge. The sustainable contactless RFID Mifare system is insensitive to magnetic fields and scratches. So you have no more trouble with wear and tear of the locks and cards. Moreover, your guests do not have to think about the manner of inserting the key card. The door open directly and easily (within 0.2 seconds) by simply holding the card in front of the reader.

The Hotek 2900 MINI is developed by Hotek and is produced by Hotek in the Netherlands. We can thus offer you the possibility to produce this unique system as 'special'. The appearance and colour can be customized to the house-style of your hotel (chain). We will gladly inform you about the additional options that the Hotek 2900 MINI has to offer.

*Beautiful finish inside and outside your hotel door.
Moreover, every type of handle is available!*

Have a look at the Hotek 2900 MINI on YouTube.
